How to fold your canary

1. Fold the paper in half as shown.

2. Fold outside corners into the centre line, and crease well.

3. Fold the top triangle backwards.

4. Fold the corners into the centre, crease well and open them again.

5. Bring the highlighted corner up and outward using the crease shown...

6. ...then bring the highlighted corner back down toward the centre...

7. ...and flatten.

8. Repeat this step on the opposite corner, so it now looks like this.

9. Fold the outermost corners back at an angle, crease well.

10. Now fold (backwards) in half.

11. Rotate the paper so that you can see a bird forming.

12. Make these creases in the paper, then unfold.

13. Using these creases, fold the head down inside the neck and push in the tail.

You may need to adjust the angle of the feet to enable the canary to stand up.
